

Resort Project Update

We will be starting the next phase of our elevator repair project on Monday, April 26th. This phase will include the replacement of cables and replacement of multiple elevator door frames on various floors.

The duration of the project is expected to last approximately 4 weeks, with a goal of being completed by Memorial Weekend.

Working hours will be 9:00 a.m.-5:00 p.m. each day. There will be some noise involved.

Throughout the duration of the project, there will only be one elevator in service at a time.

While there is never a good time to do these projects, please understand that we do try to do them in the "off-season" when occupancy is lower. We did experience COVID related manufacturing and shipping delays which has caused this project to start later than anticipated this year.

We apologize in advance for any inconvenience that this may cause but appreciate your understanding of the need to maintain and repair equipment for the safety and enjoyment of all of our guests.
